INTRODUCTION AND RESEARCH

The Need for Practice

In order to be successful in today’s mathematics classroom, students must deeply understand both concepts and procedures so that they can discuss and demonstrate their understanding. Demonstrating understanding is a process that must be continually practiced in order for students to be successful. According to Marzano (2010, 83), “practice has always been, and will always be, a necessary ingredient to learning procedural knowledge at a level at which students execute it independently.” Practice is especially important to help students apply their concrete, conceptual understanding to a particular procedural skill.

Understanding Assessment

In addition to providing opportunities for frequent practice, teachers must be able to assess students’ understanding of mathematical procedures, terms, concepts, and reasoning (Kilpatrick, Swafford, and Findell 2001). This is important so that teachers can adequately address students’ misconceptions, build on their current understanding, and challenge them appropriately.

Assessment is a long-term process that often involves careful analysis of student responses from a lesson discussion, project, practice sheet, or test. When analyzing the data, it is important for teachers to reflect on how their teaching practices may have influenced students’ responses and to identify those areas where additional instruction may be required. In short, the data gathered from assessments should be used to inform instruction: slow down, speed up, or reteach. This type of assessment is called *formative assessment* and is used to provide a seamless connection between instruction and assessment (McIntosh 1997).

HOW TO USE THIS BOOK

180 Days of Math for First Grade offers teachers and parents a full page of daily mathematics practice activities for each day of the school year.

Easy to Use and Standards-Based

These activities reinforce grade-level skills across a variety of mathematical concepts. The questions are provided as a full practice page, making them easy to prepare and implement as part of a classroom morning routine, at the beginning of each mathematics lesson, or as homework.

Every first-grade practice page provides 8 questions, each tied to a specific mathematical concept. Students are given the opportunity for regular practice in each mathematical concept, allowing them to build confidence through these quick standards-based activities.

Question	Mathematics Concept	NCTM Standards
1	Number Sense	Understands numbers, ways of representing numbers, relationships among numbers, and number systems
2	Addition	Understands meanings of operations and how they relate to one another; Computes fluently and makes reasonable estimates; Develops and uses strategies for whole-number computations, with a focus on addition and subtraction
3	Subtraction	
4	Algebraic Thinking	Understands patterns, relations, and functions; Models situations that involve the addition and subtraction of whole numbers, using objects, pictures, and symbols
5	Geometry	Analyzes characteristics and properties of two-dimensional and three-dimensional geometric shapes and develops mathematical arguments about geometric relationships; Describes attributes and parts of two- and three-dimensional shapes
6	Measurement	Understands measurable attributes of objects and the units, systems, and processes of measurement; Recognizes the attributes of length, volume, weight, area, and time
7	Data Analysis	Formulates questions that can be addressed with data and collects, organizes, and displays relevant data to answer them
8	Word Problem/Logic Problem or Mathematical Reasoning	Builds new mathematical knowledge through problem solving; Solves problems that arise in mathematics and in other contexts

Standards are listed with the permission of the National Council of Teachers of Mathematics (NCTM). NCTM does not endorse the content or validity of these alignments.

HOW TO USE THIS BOOK *(cont.)*

Using the Practice Pages

As outlined on page 4, every question is aligned to a mathematics concept and standard.

Practice pages provide instruction and assessment opportunities for each day of the school year.

Each question ties student practice to a specific mathematics concept.

Using the Scoring Guide

Use the scoring guide along the side of each practice page to check answers and see at a glance which skills may need more reinforcement.

Fill in the appropriate circle for each problem to indicate correct (☺) or incorrect (☹) responses. You might wish to indicate only incorrect responses to focus on those skills. (For example, if students consistently miss numbers 2 and 6, they may need additional help with those concepts as outlined in the table on page 4.) Use the answer key at the back of the book to score the problems, or you may call out answers to have students self-score or peer-score their work.

HOW TO USE THIS BOOK *(cont.)*

Diagnostic Assessment

Teachers can use the practice pages as diagnostic assessments. The data-analysis tools included with the book enable teachers or parents to quickly score students' work and monitor their progress. Teachers and parents can see at a glance which mathematics concepts or skills students may need to target in order to develop proficiency.

After students complete a practice page, grade each page using the answer key (pages 191–206). Then, complete the *Practice Page Item Analysis* (page 7, or [pageitem.pdf](#)) for the whole class, or the *Student Item Analysis* (page 8, or [studentitem.pdf](#)) for individual students. These charts are also provided as both *Microsoft Word*® files ([pageitem.doc](#) and [studentitem.doc](#)) and as *Microsoft Excel*® files ([pageitem.xls](#) and [studentitem.xls](#)). Teachers can input data into the electronic files directly on the computer, or they can print the pages and analyze students' work using paper and pencil.

To complete the Practice Page Item Analysis:

- Write or type students' names in the far-left column. Depending on the number of students, more than one copy of the form may be needed or you may need to add rows.
- The question numbers are included across the top of the chart. Each item correlates with the matching question number from the practice page.
- For each student, record an *X* in the column if the student has the item incorrect. If the item is correct, leave the item blank.
- If you are using the *Excel* file, totals will be automatically generated. If you are using the *Word* file or if you have printed the PDF, you will need to compute the totals. Count the *Xs* in each row and column and fill in the correct boxes.

To complete the Student Item Analysis:

- Write or type the student's name on the top row. This form tracks the on-going progress of each student, so one copy per student is necessary.
- The question numbers are included across the top of the chart. Each item correlates with the matching question number from the practice page.
- For each day, record an *X* in the column if the student has the item incorrect. If the item is correct, leave the item blank.
- If you are using the *Excel* file, totals will be automatically generated. If you are using the *Word* file or if you have printed the PDF, you will need to compute the totals. Count the *Xs* in each row and column and fill in the correct boxes.

HOW TO USE THIS BOOK *(cont.)*

Student Item Analysis

Directions: Record an *X* in cells to indicate where the student has missed questions. Add up the totals. You can view: (1) which questions/concepts the student missed; (2) the total correct score per day; and (3) the total number of times each question/concept was missed.

Student Name: Sample Student									
Question	1	2	3	4	5	6	7	8	# Correct
Day									
1		X			X	X			5/8
Total									

HOW TO USE THIS BOOK *(cont.)*

Using the Results to Differentiate Instruction

Once data is gathered and analyzed, teachers can use the results to inform the way they differentiate instruction. The data can help determine which concepts are the most difficult for students and which need additional instructional support and continued practice. Depending on how often the practice pages are scored, results can be considered for instructional support on a daily or weekly basis.

Whole-Class Support

The results of the diagnostic analysis may show that the entire class is struggling with a particular concept or group of concepts. If these concepts have been taught in the past, this indicates that further instruction or reteaching is necessary. If these concepts have not been taught in the past, this data is a great pre-assessment and demonstrates that students do not have a working knowledge of the concepts. Thus, careful planning for the length of the unit(s) or lesson(s) must be considered, and extra frontloading may be required.

Small-Group or Individual Support

The results of the diagnostic analysis may show that an individual or small group of students is struggling with a particular concept or group of concepts. If these concepts have been taught in the past, this indicates that further instruction or reteaching is necessary. Consider pulling aside these students while others are working independently to instruct further on the concept(s). Teachers can also use the results to help identify individuals or groups of proficient students who are ready for enrichment or above-grade level instruction. These students may benefit from independent learning contracts or more challenging activities. Students may also benefit from extra practice using games or computer-based resources.

Teacher Resource CD

The Teacher Resource CD provides the following resources:

- NCTM Correlations Chart
- Reproducible PDFs of each practice page
- Directions for completing the diagnostic Item Analysis forms
- Practice Page Item Analysis PDF, *Word* document, and *Excel* spreadsheet
- Student Item Analysis PDF, *Word* document, and *Excel* spreadsheet

HOW TO USE THIS BOOK *(cont.)*

NCTM Standards

The lessons in this book are aligned to the National Council of Teachers of Mathematics (NCTM) standards. The standards listed on page 4 support the concepts and skills that are consistently presented on each of the practice pages.

Standards Correlations

Shell Education is committed to producing educational materials that are research and standards based. In this effort, we have correlated all of our products to the academic standards of all 50 states, the District of Columbia, and the Department of Defense Dependent Schools, as well as to the Common Core Standards.

How to Find Standards Correlations

To print a customized correlation report of this product for your state, visit our website at <http://www.shelleducation.com> and follow the on-screen directions. If you require assistance in printing correlation reports, please contact Customer Service at 1-877-777-3450.

Purpose and Intent of Standards

The No Child Left Behind legislation mandates that all states adopt academic standards that identify the skills students will learn in kindergarten through grade twelve. While many states had already adopted academic standards prior to NCLB, the legislation set requirements to ensure the standards were detailed and comprehensive.

Standards are designed to focus instruction and guide adoption of curricula. Standards are statements that describe the criteria necessary for students to meet specific academic goals. They define the knowledge, skills, and content students should acquire at each level. Standards are also used to develop standardized tests to evaluate students' academic progress.

Teachers are required to demonstrate how their lessons meet state standards. State standards are used in development of all of our products, so educators can be assured they meet the academic requirements of each state.

Two more kids are surveyed. Both like the monkey bars best. Now which activity is the favorite?

8. A team scored 8 runs in a baseball game. Three of the runs were made by Chan. How many runs were made by other teammates?

ANSWER KEY

Day 1

- 16 stars
- 6 baseballs
- 2 flowers
- 1
- The circle should be colored.
- The longer snake should be circled.
- tea cups: 4 tally marks
saucers: 3 tally marks
- A circle should be drawn around the group of 2 happy faces.

Day 2

- 5, 7
- 7 flowers
- 4 frogs
- B, A
- 4
- The boot should be circled.
- 4 home runs
- 4

Day 3

- 6
- 7 fish
- 7 cans
- 2
- yes
- 2 or two
- 3 pencils
- 4 flowers

Day 4

- The number 8 should be circled.
- 9 pencils
- 7 screws
- +
-  Any one line should be drawn.
- The kettle should be circled.
- 3 children
- 3 cats

Day 5

- 2nd
- 9 squares
- 3 ice cream cones
- $1 + 3$
 $2 + 2$
 $4 + 0$
- The can should be circled.
- yes
- 5 awards
- 6 wheels

Day 6

- 12
- 7
- 3
- 2, 1
- A fish should be drawn in the box.
- The shorter pants should be circled.
- 5
- 2 scoops

Day 7

- 10
- 8
- 4
- 0
- no
- The hamburger should be circled.
- 7 children
- $1 + 3 = 4$ or $3 + 1 = 4$

Day 8

- 12, 14
- 8
- 2
- 0
- A square with a dot outside of it should be drawn.
- 8 or eight
- 8 children
- 2, 3, 1

Day 9

- 4
- 6
- 4
- +
- A circle should be drawn.
- no
- 2 children
- a dog

Day 10

- There should be 1 square drawn; 5 squares
- 9
- 4
- 4
- left
- The bucket should be circled.
- 3 children
- Wednesday

Day 11

- 15 stars
- $2 + 4 = 6$
- $6 - 5 = 1$
- 
- The square should be colored.
- The taller camel should be circled.
- Boys: 4;
Girls: 3
- There should be a circle around the group of 10 stars.

Day 12

- 0
- $3 + 3 = 6$
- $5 - 3 = 2$
- 1
- 3
- The larger circle should be circled.
- 15 home runs
- 9

ANSWER KEY *(cont.)*

Day 13

- 9
- $5 + 2 = 7$
- $5 - 5 = 0$
- $2 + 3$
 $3 + 2$
 $4 + 1$
- yes
- The bear should be circled.
- 5 pencils
- 4 stickers

Day 14

- 19, 21
- $4 + 2 = 6$
- $6 - 4 = 2$
-
- Either line is correct.

- 5 or five
- 8 people
- 2 crackers

Day 15

- 7th
- $3 + 5 = 8$
- $8 - 2 = 6$
- 2
- The cone should be circled.
- yes
- 2 awards
- 6 years old

Day 16

- 20
- $4 + 3 = 7$
- $6 - 2 = 4$
- 3
- yes
- The bigger frog should be circled.
- 13
- 6 cars

Day 17

- 14
- $6 + 1 = 7$
- $5 - 1 = 4$
- 0
- A tree should be drawn with a sun above it.
- 3
- 7 tally marks for cats;
9 tally marks for dogs
- 1, 4, 7

Day 18

- 9
- $5 + 2 = 7$
- $6 - 2 = 4$
- B, A
- yes
- The trash can should be circled.
- Water Parks: 3 tally marks;
Amusement Parks: 5 tally marks
- 2 bikes

Day 19

- 34, 36
- $1 + 6 = 7$
- $4 - 3 = 1$
- 1
- A square should be drawn.
- The longest line should be circled.
- 5 children
- add

Day 20

- There should be two circles drawn; 5 circles
- $5 + 4 = 9$
- $7 - 4 = 3$
- +
- The square should have a circle drawn above it.
- yes
- Answers will vary. Possible answer: What is your favorite animal?
- January

Day 21

- 12 should be circled.
- $5 + 5 = 10$
- $7 - 5 = 2$
- 4
- The triangle should be colored.
- yes
- 3; 3
- Both groups of three dots should be circled.

Day 22

- 18 stars
- $6 + 3 = 9$
- $8 - 5 = 3$
- 2
- 0
- 11:00
- 7 home runs
- 8

Day 23

- 29, 31
- $4 + 3 = 7$
- $8 - 4 = 4$
- sad face; happy face
- yes
- The larger square should be circled.
- 8 pencils
- 9 stickers

Day 24

- 1
- $3 + 7 = 10$
- $9 - 3 = 6$
- 0
- ☺
- The pitcher should be circled.
- 8
- 3 carrots

ANSWER KEY *(cont.)*

Day 25

- 7
- $6 + 4 = 10$
- $9 - 5 = 4$
- $1 + 1$
 $0 + 2$
- The ball should be circled.
- 4
- 4 awards
- 9 sides

Day 26

- 13
- 2
- $4 - 3 = 1$
- 2
- A frog should be drawn on the lily pad.
- yes
- 6 children
- 4 bones

Day 27

- 50
- 4
- $7 - 5 = 2$
- 1
- yes
- The hen should be circled.
- 6 children
- $2 + 3 = 5$ or $3 + 2 = 5$

Day 28

- 3 happy faces should be drawn; 8 happy faces
- 1
- $5 - 4 = 1$
- down arrow
- yes
- The pitcher should be circled.
- 5 children
- Jack: blue; Elly: red

Day 29

- 10th
- 5
- $9 - 4 = 5$
- 0
- A triangle should be drawn.
- 1 or one
- 5 children
- a man

Day 30

- 41, 43
- 5
- $7 - 5 = 2$
- +
- right
- The baseball should be circled.
- more girls
- 3:00

Day 31

- 10
- 3
- $6 - 2 = 4$
- 1
- The rectangle should be colored.
- 7 or seven
- Cats: 1
Dogs: 3
Birds: 2
- 11, 12, 13, 14, 15

Day 32

- 24
- 2
- $5 - 2 = 3$
- empty circle
- 4
- no
- Jamal
- 14

Day 33

- 19 stars
- 3
- $7 - 6 = 1$
- 1
- no
- yes
- yes
- 6 birds

Day 34

- 10
- 4
- $5 - 3 = 2$
- $5 + 0$
 $1 + 4$
 $3 + 2$
- The dress should have a vertical line down the center.
- The quarter should be circled.
- 10
- Friday

Day 35

- 22, 24
- 5
- $9 - 5 = 4$
- 4
- The block should be circled.
- The crayon should be circled.
- 6 awards
- 2 children

Day 36

- 1
- 4
- 1
- 1
- no
- February
- 7 children
- 5 stickers

ANSWER KEY *(cont.)*

Day 37

- 16
- 3
- 0
- 6
- sphere
- 4 or four
- 6 children
- 0, 3, 6, 8, (optional 9)

Day 38

- 40
- 5
- 2
- 2
- no
- The dog should be circled.
- Answers will vary.
- 1 car

Day 39

- 48, 50
- 2
- 1
-
- A rectangle should be drawn.
- 5
- Tacos: 4 faces;
Pizza: 6 faces;
For example

Tacos	
Pizza.	

- legs on a spider

Day 40

- There should be 2 triangles drawn; 7 triangles
- 4
- 1
- 1
- A square should be drawn below the triangle.
- The car should be circled.
- Answers will vary. Possible answer: What is your favorite color?
- January

Day 41

- 15

8. 2 outfits

Day 179

1. 47, 48
2. 13
3. 3
4. 5
5. A shape with more than 5 sides should be drawn. Possible answers include: hexagon or octagon.
6. 6:30
7. 3 students
8. 5 blue and red cars

Day 180

1. 89 should be circled.
2. 17
3. 3
4. 14
5. A cloud should be drawn next to the airplane.
6. half past 12 or half past twelve;
12:30
7. monkey bars
8. 5 runs

Provide quick and purposeful daily practice to build mastery in mathematics.

Reinforce grade-level skills and enhance students' mathematical proficiency using *Practice, Assess, Diagnose: 180 Days of Math for First Grade*. This standards-based resource provides an engaging and purposeful practice page for every day of the school year. The practice pages follow a consistent format, and each key mathematical skill or concept is addressed daily. Use the included diagnostic tools to record evidence of student learning, assess student and class progress, and identify students' intervention or enrichment needs.

The mathematical skills targeted in this book include:

- Number Sense
- Addition
- Subtraction
- Algebraic Thinking
- Geometry
- Measurement
- Data Analysis
- Word and Logic Problems
- Mathematical Reasoning
